The Interuniversity Honor Center of Italian Universities - H2CU, and the Inter-University Center "Centro Interuniversitario per l'Innovazione Tecnologica e lo Sviluppo del Territorio" - CINTEST, organized, in collaboration with the Fordham University of New York and other USA Universities, the International Program on World Cultural Heritage Studies for 2018. Two distinct programs were set, one for the humanities and one for the technology field of studies.

The stringent requirements in cultural heritage preservation and the emerging use of new solutions for consolidation, recovery, rehabilitation, re-functionality and energy retrofit of historic buildings, represents a new professional path required by the real world market.

Humanities focus is also dedicated to the preservation of ancient oral traditions from the Middle Ages by highlighting new dimensions of intangible cultural heritage such as the magic dimension, the power of rituals, the charms of liturgy, science, medicine, etc.

In this view, these two parallel 2-week long summer courses are aimed at sharing knowledge and new technical skills within these two umbrellas, both aimed at appreciating this legacy of physical science artifacts and intangible attributes for the current and next generations.

Summer Program #1 in USA, NYC - July 16th – July 28th , 2018

@Fordham University, Lincoln Center

Course: Structural strengthening and rehabilitation of historic buildings, by Marco Savoia (University of Bologna), Anna Saetta (University IUAV Venezia)
